MATERNAL FETAL MEDICINE

Maternal Fetal Medicine specialists co-manage the care of normal and high-risk patients with their referring obstetricians. These specialists provide a full range of consultation services, including pre-conception and genetic counseling, prenatal diagnosis, management of medical complications and inpatient consultations at affiliated hospitals.

As experts in the use of high-resolution ultrasound, Maternal Fetal Medicine specialists combine state-of-the-art technology with extensive training in the area of high-risk obstetrics to provide a comprehensive range of invasive and non-invasive testing modalities.

Alfredo Rodriguez-Martirena, M.D.

Dr. Alfredo Rodriguez-Martirena is the Medical Director of North Dade Perinatal Medicine. He completed his fellowship training in maternal fetal medicine at the University of South Florida in Tampa. Since 1993, he has served the South Florida community as a leader and accomplished speaker in his specialty through both academic and private practice.

Ryan E. Longman, M.D.

Dr. Ryan Longman is the Director of the Division of Reproductive Genetics for the Department of Obstetrics and Gynecology at the University of Miami Miller School of Medicine. Prior to coming to South Florida, he served as Director of Obstetrical Genetics at the Washington University School of Medicine in St. Louis. He completed a maternal fetal medicine fellowship and residency in medical genetics at the University of Michigan.
